

# Shaping the Future of U.S. Gas Power with Total Plant Solutions

Driven by the power of hardware + software

## Veolia North America Project Powering Boston's Medical Community Forward

### GE's Total Plant Solution

- Rotor Exchange
- Asset Performance Management software
- Advanced Gas Path
- DLN2.6+ combustion

### Veolia's Kendall Cogeneration Plant

- Increased output
- Better efficiency
- Broader operational flexibility

- 1,700+ hospital beds
- 250+ health institutions/commercial buildings
- 2.3 million patient visits annually

### Powering Boston's "Biotechnology Corridor"

## Helping Arizona Public Service Deliver Flexible Power

### GE's Total Plant Solution

- Advanced gas path
- Dry Low NOx combustion
- Dispatch optimization software

### Redhawk Power Plant

- 6% output increase
- 2% efficiency increase
- Faster start-up
- Peak fire capability

- Helping provide **3.3 GW** of power
- Electricity for **4 million** residents

### Clean power for the Southwest
